

Teacher's guide: Can it be reused?

Theme

- Reuse
- Recycling
- Landfill
- Material
- knowledge

Recommended Duration in

- 20 min.

Introduction

The apprentice is presented with images and descriptions of various brick products and must choose whether the brick can be reused, recycled, or should be disposed of.

The purpose of the exercise is to provide the apprentice with the opportunity to practice knowledge about the reusability of brick products.

Learning Objectives

The apprentice can determine to what extent it is possible to clean and reuse brick products.

The apprentice has knowledge of significant factors determining whether bricks can be reused.

Content and Purpose

The apprentice works to expand their material knowledge regarding the reusability of bricks.

Suggested Teaching Plan

Presentation of the activity (2 min.)

- The teacher introduces the class to the quiz on the website.

Individual work (15 min.)

- Apprentices take the quiz on the website.

Plenary Recap (3 min.)

- Questions that have been challenging for apprentices are discussed.
